## About me

I have started to programming about in my last high school year. I always feel upset when I can not solve a problem, so this property led me to a relatively fast go-on with basics. When I got into the university it became clear that this was what I always wanted to do.

## Skills

(\*)[The skill scale means language specifications from 0 (Fundamental Awareness) to 6 (Expert) .]

## Interests

I am interested mainly in jobs and researches related to software development, software analysis(which is the theme of my thesis and my current research) and artificial intelligence.

## Education

- since 2016 Programmer mathematician B.Sc. Szeged, Csongrad  
University of Szeged
- 2012-2016 High school Cegled, Pest  
Kossuth Lajos Secondary Grammar School

## Languages

## Experience

- 2018 CSCS 2018 - 11th Conference of PhD students  
Edit Pengo, Zoltan Sagodi, Ervin Kobor: Who Are You not gonna Call? A Definitive Comparison of Java Static Call Graph Creator Tools
- 2018 Trainee at the Department of Software engineering  
Started a research in theme of my thesis.
- 2017- Started to work for the Institute of Informatics  
In my second B.Sc. year i became a demonstrator at my university.  
Currently I am still teaching.

## Other information

### Review

My main virtue is the team spirit, actually I am a team player. I have not met with better feeling than being in an operative, succesful team.  
Giving motivation is my other advantage. I easily can see the usefulness of tasks and this way it is easy to stay motivated. If my working environment starts to lose their optimistic mood, I like to pass my attitude through.  
To keep our tolerance is one of the most important habits nowadays. Whenever possible I try to act like that because it is the basis of teamwork.
